I only salvaged one small accordion folder of John's that was marked BaP, but you are welcome to look thru it. I will not be here, but I will leave it on my table for you. I am in room 11785 PYS. The door will be closed, but not locked, so just walk right in.

Hi Linda, I just remembered the files/papers from Jon Schaum that you mentioned previously. Would you be able to give me those to flip through when I am in the office on Tuesday? It doesn't give me much time before the meeting, but I might want to flip through to see if he has any additional BaP dermal absorption studies that I don't have.

OK, thanks. I did it, so I am all set. I will participate via webinar because I will not be in VA that day. Sorry I will not get to see you.

Hi Linda, you need to register with ICF on the website, then they will send you details about how to call in a few days in advance.

Here is the website for registration: <https://www.epa.gov/iris/iris-public-science-meeting-june-2016>

Hi Kathleen – I did not see a call-in number for this. Is there one? I will not be in DC that day, but would like to call in and listen to the meeting.

Hi all, here is the agenda for the dermal slope factor meeting with NRC experts. It is scheduled from 10-5 on Wednesday, June 29th. I hope everyone is going to be able to participate. It looks like we have a good roster of NRC identified experts (the panelists are listed on the attached agenda).

I am hoping we get a lot of good advice at this meeting.

-Kathleen
